Operating performance

Solid performance compared to the market

Occupancy Rates	**Retail: 99%**	▪ In retail, Fibra SOMA has consistently maintained average occupancy levels close to 100%.
	Offices: 97%	▪ Office occupancy highlights the value of the Fibra's assets within this segment.
Average Rent per sqm	**Retail: $642**	▪ Average rents reached $642 per sqm in retail and $528 per sqm in offices, supported by the quality, location, services, and tenant mix of the portfolio.
	Offices: $528	
Lease Spreads	**7% - 8%**	▪ Lease spreads of 7% to 8% are driving recurring organic revenue growth. ▪ These spreads demonstrate strong demand for the portfolio's assets and their differentiated characteristics.
NOI Growth	**CAGR of 14.7% (2019 – 3Q26 LTM)**	▪ The portfolio's NOI has delivered a CAGR nearly twice the average of comparable Fibras in Mexico. ▪ The expansion is driven by the start of operations of assets under development and the integration of acquisitions into the portfolio.

Comments from our CEO

Dear investors,

I am pleased to share with you our results for the third quarter of 2026, a period in which we are beginning to see the value created through our investment and development strategy materialize, as reflected in the strong growth achieved during the quarter. This performance is driven by the operational strength of our stabilized portfolio, together with the efforts undertaken to complete, open, and gradually ramp up our development projects. The quality of our assets, operational excellence, and a long-term investment vision remain the cornerstones of our value creation strategy.

During the quarter, revenues reached MXN$1,189 million, representing a 34% increase compared to the same period last year, while NOI totaled MXN$900 million, a 40% increase versus 3Q25. AFFO reached MXN$290 million. These growth rates reflect the strong operating performance of our stabilized assets and the increasing contribution from investments made over the past several years, as our development projects gradually become operational and contribute to the portfolio. Looking ahead, we will remain focused on maximizing the performance of our existing assets, advancing the stabilization of our newly opened developments, and allocating capital in a disciplined manner toward opportunities that drive long-term value creation.

On July 16, we completed a MXN$750 million capital reimbursement distribution to holders of our CBFIs. This distribution reflects our transition from a development-focused period to one characterized by stronger cash flow generation. It also demonstrates our commitment to disciplined capital allocation, maintaining an appropriate balance between investor returns, financial strength, and the resources needed to continue executing our growth strategy.

During the quarter, we continued making progress on our development projects, with three scheduled to open in 4Q26. These milestones are part of a selective growth strategy supported by high-quality assets, prime locations, and a long-term investment approach.

As in previous periods, it is worth reiterating that financial discipline remains a core pillar of our strategy. We continue to prioritize preserving our credit strength, optimizing our cost of capital, and maintaining financial flexibility. We closed the quarter with a 29.6% leverage ratio (total debt to total assets), with no significant debt maturities until 2029.

Comments from our CEO

Regarding sustainability, on August 27 we published our 2025 voluntary sustainability report. In it, we highlight the progress made across the environmental, social, and corporate governance pillars of our strategy. The report reflects the evolution of our initiatives, metrics, and processes, as well as the deeper integration of sustainability considerations into Fibra SOMA's operations and decision-making. This publication complements the report prepared in accordance with IFRS S1 and S2 Standards, which was released during the second quarter. It represents another important step in our commitment to transparency and accountability.

As we enter the final quarter of the year, we remain focused on maintaining disciplined execution and optimizing the performance of our portfolio, with the goal of creating long-term value for all our stakeholders.

Best regards,

José Juan Sordo Madaleno de Haro
Chief Executive Officer – Pangea Administración, S.C.

- Net Operating Income (NOI) was MXN$900 million in 3Q26, with a margin of 76%. This represents a 40% increase compared to 3Q25.
- EBITDA reached MXN$813 million in 3Q26, on a 68% margin. This represents a 41% increase compared to 3Q25.
- Consolidated AFFO for 3Q26 was MXN$290 million, on a 24% margin. This represents a 122% increase compared to 3Q25.
- The number of outstanding CBFIs with economic rights stood at 940,374,798 at the close of 3Q26.

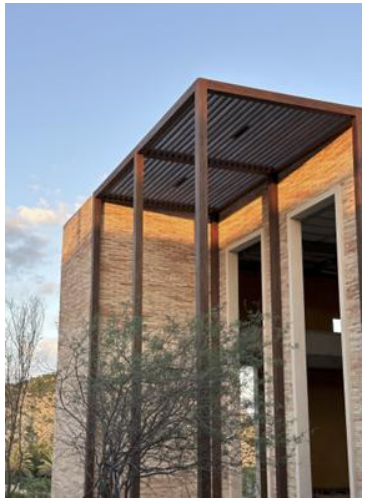

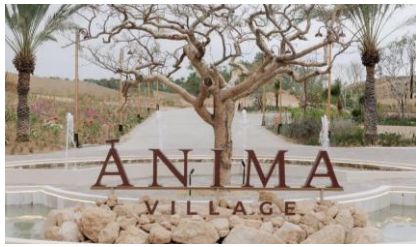

(1) As a result of the successful capital raise during the second half of 2025, the revolving credit lines were repaid in full, generating efficiencies in the interest burden and considerably increasing AFFO.
(2) The MXN$750 million distribution made on july 16 is not represented as a distribution to CBFI holders, as it was carried out through a return of capital.

- The total outstanding debt balance at the close of 3Q26 was MXN$26,496 million.
  - The main changes during the quarter were driven by foreign exchange fluctuations, which resulted in a MXN$682 million increase in the outstanding debt balance, and the drawdown of MXN$500 million under the Reforma project bridge loan.
  - During the quarter, principal repayments totaling MXN$20 million were made on the Term Loan (TL24 MXN) and PO Querétaro facilities.
- On August 21, a bridge loan of up to MXN$1,700 million was executed to finance the development of the Reforma project. A senior loan is expected to be formalized during 2027 to refinance this bridge facility.
- The debt maturity profile remains healthy, with no significant maturities until 2029.
- The revolving credit facilities remain fully available
- Development loans continue to be secured at the asset level, and the associated financing costs are incorporated into each project's budget. As a result, no additional funding from Fibra SOMA is required to complete the projects.
- Fibra SOMA reaffirms its objective of achieving a dual investment-grade rating by adhering to a rigorous financial discipline.

(1) These loans are development financing at the asset level and therefore do not generate obligations for Fibra SOMA.

Acquisition of Fully Stabilized Assets

- Focus on fully stabilized assets that generate NOI, within the retail, mixed-use, office, and hotel sectors, located in the three main cities of Mexico.

Working to Obtain a Dual Investment Grade

- In terms of leverage and capital structure, Fibra SOMA is focused on strengthening its credit metrics and size to eventually obtain investment-grade ratings from both agencies.
- In May, Moody's revised Fibra SOMA's outlook from stable to positive and affirmed its issuer rating of Ba1, supported by the improvement and optimization of the capital structure as well as the significant progress in the projects under development.

(1) The dates shown indicate the periods during which the assets under development will be delivered to their tenants.

ESG strategy

Environmental, Social and Governance

For Fibra SOMA, the integration of ESG principles into operations is essential for sustainable and responsible growth. The Fibra aims to measure, report, and improve its performance in line with international sustainability standards.

Environmental

- **Energy transition at Antea.** During the quarter, the **second phase of Antea's energy transition project** started operations. This new stage will increase the use of renewable energy, with expected benefits in both operating costs and the property's carbon footprint.
- **Scope 3 emissions measurement.** In collaboration with the **Mexican Association of Fibras (AMEFIBRA)**, Fibra SOMA is participating in the development of industry-wide criteria to advance the measurement and disclosure of **Scope 3 greenhouse gas (GHG) emissions**, in accordance with the GHG Protocol and taking into account the categories applicable to the real estate business model.

Social

- **Well-being and development.** Pangea Administración SC, manager of Fibra SOMA, promotes a **healthy organizational culture**. In line with **NOM-035**-STPS-2018, during the quarter, 69 activities were carried out, generating 150 participations and totaling 1,099 participation hours. The program also included initiatives aimed at team member's families, promoting a holistic approach to well-being. In terms of training, **42 workshops and courses** were delivered, totaling **376 hours of training**.
- **Specialized training in sustainability and ESG management.** During the quarter, the Sustainability team participated in specialized programs organized by BIVA, Social Value, Deloitte and AMEFIBRA covering regulation, sustainable finance, climate change, energy efficiency, and governance, further strengthening Fibra SOMA's technical and ESG management capabilities.

Governance

- **Publication of the 2025 Sustainability Report**. For the third consecutive year, Fibra SOMA published its **voluntary Sustainability Report** for fiscal year 2025 (link), reaffirming its commitment to transparency and ESG disclosure. The report incorporates references to international standards such **GRI and SASB**, and complements the information disclosed under IFRS S1 and S2 Standards.
- **International certification in information security.** Fibra SOMA obtained the **ISO/IEC 27001:2022 certification for information security management** after successfully completing an audit conducted by an accredited certification body. This recognition is the first of its kind awarded to a Mexican FIBRA and provides evidence of the organization's robust information management and protection mechanisms, as well as its corporate governance and control practices.
